Pearl Making home *performance* matter.

Meet the Pearl experts.

Cynthia Adams

CEO & Co-founder

Cynthia co-founded Pearl in 2013 to transform how the U.S. housing market recognizes and rewards home performance. She is a winner of the Building Performance Association's Linda Wigington Leadership Award, a gubernatorial appointee to the Virginia Energy Council, and a member of NAR's Sustainability Advisory Group.

Expertise:

- Energy efficiency's impact on home value and the real estate market
- Federal incentives (IRA rebates and tax credits) reshaping home improvement
- Women in cleantech leadership

"As housing costs and risks rise, understanding how a home performs is no longer optional. Every mature market runs on shared standards—and housing has been missing one for performance. For decades, home performance data has been inconsistent, incomplete, or impossible to compare. Pearl is changing that by creating a national standard and building the first system that makes home performance measurable, searchable, and actionable—so buyers can make smarter decisions with fewer surprises."

Robin LeBaron

President, Standards and Policy & Co-founder

has made a career working to bring about transformation in the housing field, with experience in multifamily affordable housing, manufactured housing, and residential energy efficiency.

Tim Stanislaus

Senior Vice President, Business Development

fdbhfxghfgfg

Casey Murphy
