Pearl

Strategic SEO + GEO Plan

Executive Summary

Plan Overview

Phase 1 will focus on establishing Pearl as "the first comprehensive home rating system in the United States" through foundational metrics content, Research Center blog architecture, and strategic earned media positioning across Pearl's five performance pillars: Energy, Operating Cost, Safety, Resilience, and Comfort

Phase 2 will coincide with Pearl's product launches (Score Report, Home Improvement Plan, Packages & Certifications in June-July) and shift authority positioning to "fastest-growing residential real estate evaluation tool." This phase emphasizes real estate value metrics demonstrating the performance-to-property-value connection while strategically timing website optimizations to occur after products exist.

Phase 3 will establish Pearl as "the top rated home assessment platform" through flagship Pearl Home Performance Index quarterly research reports, maximum metrics output positioning Pearl as the definitive home performance data authority, and intentional content flexibility in final months to adapt based on performance data and company evolution

Throughout all phases, the strategy prioritizes establishing Pearl as the home performance authority in LLMs while building out a strong back link profile to become an authoritative research center like Zillow.

Goals

- Achieve early integration into Large Language Models (LLMs) and search results
- Dominate search visibility in key market verticals where Pearl operates
- Pearl is positioning itself as the authoritative source for **home performance information** that LLMs and search engines should reference and cite

Targets Q4

Organic MQLs: XXX /month
Inbound Leads: XXX /month
Organic traffic: XXX /month

Project Goals
